

# Smart Support for Safer, Cleaner School Zones

**Intelliscope is actively supporting the School Streets programme in the UK by leveraging our expertise in technology and systems integration to enhance road safety and improve air quality around schools.**

## **School Streets Programme**

A School Street is a road outside a school with a temporary restriction on motorised traffic at school drop-off and pick-up times. The restriction applies to school traffic and through traffic. The result is a safer, healthier and pleasant environment for everyone.

## **How We Help**

We provide advanced mobile and static traffic enforcement solutions to help local authorities enforce traffic restrictions during busy school hours. By collaborating with local councils, schools, and communities, we ensure the effective implementation of these zones which in turn reduces congestion and improves air quality.

Our innovative approach and technology not only safeguards children but also encourages better driver behaviour, creating healthier, safer environments around schools and contributing to broader environmental goals.

## Benefits

**Healthier, congestion-free environments around schools**

**Encourages safe and sustainable driving practices**

**Improved emergency vehicle access**

**Safe and clear routes to school for children**

**Increased levels of walking, scooting and cycling to school**

**Rapid, non-intrusive installation**

**By fostering partnerships with local authorities and prioritising safety and sustainability, we contribute to the long-term success of School Streets across the UK. Intelliscope and Enfield Council have been partners for over a decade and have over 90 systems in place across the borough.**

Enhancing road safety around schools is of paramount importance not only for people walking, scooting and cycling to school, but also for other road users and local residents. By working with Intelliscope we've been able to effectively reduce the flow of traffic during school drop off and pick up times at locations such as Chesterfield Primary and Latymer All Saints Primary schools following the introduction of School Streets, with our monitoring suggesting this reduction is in excess of 70%. This clearly shows the positive impact the solution is having on the local area which is now safer and at lesser risk of traffic accidents, and healthier with improved air quality.

**"We're excited to be continuing our partnership with Intelliscope and helping make the environment around our schools safer so people can choose to walk, wheel or cycle to school."**

- Liz Rhodes, Journeys and Places Communications & Engagement Lead at Enfield Council
