

## Network Rail Online Logistics

# Smarter Planning, Stronger Collaboration, Better Rail Operations.

NROL, designed and maintained by Intelliscope, supports the delivery of heavy materials and equipment for Network Rail's (NR) rail infrastructure maintenance and engineering teams. It facilitates planning, 24/7 control and performance reviews.

NROL enhances collaboration, visibility, and efficiency, integrating with many other NR systems.

## FEATURES

- Integrated planning platform
- Applications optimised for mobile use
- Varied delivery service management
- Available 24/7
- User accessibility
- Multimedia support
- Cost management
- Seamless system integration with other NR systems
- Materials catalogue
- Comprehensive reporting capabilities

## BENEFITS

- Accurate, up-to-date information
- Enhanced operational control
- Integrated planning and proactive management
- Reduced service delivery failures
- Easy user management
- Continuous improvement
