

# RoadflowHosted

## An Intelligent, Hosted Solution For Smarter Enforcement

**A secure, UK-hosted back office for smarter, scalable traffic enforcement.**

Roadflow Hosted is a VCA-certified enforcement platform that reduces the need for roadside infrastructure by moving evidence capture and processing into a secure, UK-hosted cloud environment. Cameras connect directly to the hosted back office, where contraventions are processed and reviewed by authorised Council teams.

Supporting multiple enforcement applications—including bus lanes and gates, banned turns, yellow box junctions, school keep clear zones, and School Safe Havens—Roadflow Hosted gives Local Authorities a scalable, flexible way to improve safety, cut congestion, support public transport, and reduce emissions.

### USE CASES

## FEATURES

- › Fully managed SaaS solution
- › UK hosted solution
- › No 3rd party remote access
- › Multifactor authentication
- › Web based applications
- › CREST approved penetration testing
- › Disaster recovery capability
- › Fully remote, scalable cloud environment

## BENEFITS

- › VCA Certified
- › Maximised availability and up time
- › IT infrastructure cost saving
- › Scalable and flexible
- › Remote cloud based web
- › Cyber security threat resilience
- › Low maintenance
